

## Consent Form for RadGrad usability study

I agree to participate in a class exercise conducted by students in ICS 414, Software Engineering II, Spring 2016, taught by Professor Philip Johnson:

- The purpose of this class exercise is for software engineering students to gain an understanding of usability testing by practicing it with other students as subjects.
- The exercise will take from 15-30 minutes, and will involve looking at screen shots of a system called “RadGrad” and answering questions asked by the students.
- There is no risk to you from your participation. Your comments will be recorded for later review by the students in order to evaluate the usability of their design. These recordings will be destroyed at the end of the exercise.
- The only potential use of your data is to improve the design of the RadGrad system. Data from your participation will not be published. Any data collected will be analyzed anonymously.

I understand that participation in this class exercise is voluntary, for educational purposes only, and I agree to immediately raise any concerns or areas of discomfort during the session with the study administrator.

If you wish your data to be excluded from the remainder of the class exercise, please contact Professor Philip Johnson, Johnson@hawaii.edu, 808-956-3489, POST 307.

Please sign below to indicate that you have read and you understand the information on this form and that any questions you might have about the session have been answered.
